Tally.ERP 9

Knowledge base

How do I manage my Tally.ERP 9 License?

What is this document about?

A Tally.ERP 9 license is tied to the machine it is installed on (for the Gold edition, the license is installed on one system on the LAN, called the License Server).

You may have to perform system maintenance on the license server- maybe to re-install the operating system (OS), upgrade the OS, add or remove hardware, format the hard disk and so on. In most of these cases, Tally.ERP 9 will assume that the system is a different one, and will go into educational mode.

Why this should be done?

For business continuity it is imperative that you surrender ('surrender' is another name for 'park') the license with Tally, to reactivate on the same machine after maintenance or on another machine.

Scenarios where you need to surrender the Tally.ERP 9 License:

<u>Scenario 1</u>

- > To shift the license from one system to another.
- > To format the system.
- > To re-install the operating system (Windows).
- > To install Tally.ERP 9 in a new folder.

<u>Scenario 2</u>

- Already formatted the system
- Already re-installed the operating system (Windows)
- Computer crashed

Detailed procedure for Surrender:

Scenario 1:

Execute Tally.ERP 9.

- 1. From Gateway of Tally → F12→ Licensing →surrender license. (Fig. 1).
- 2. A message is displayed, 'You are about to surrender the license' (Fig. 2).
